GENERAL NOTICE TO CONTROL NOXIOUS WEEDS

The Utah Noxious Weed Act, Utah Code Annotated, 4-17-1 et-al, Sec. 7, specifically states, that it is the responsibility of any person who owns or controls land in the State of Utah, to control any noxious weeds growing on such land and to prevent the spread of same by cutting, tillage, cropping, pasturing or treating with chemicals or other effective methods or combination thereof, approved by the County Weed Control Supervisor, and as often as may be required to prevent the weed from blooming and maturing seeds or spreading by root, root stalks or other means.

When the land owner or person in possession of property within Sanpete County, upon which noxious weeds are present, fails to control or prevent their growth and spread, the County Weed Control Supervisor, or any member of the County Weed Board, has the prerogative to notify the property owner that their property can, and may be declared a Public Nuisance. Five days after your property has been declared a Public Nuisance, the County may, after reasonable notification, enter the property without your consent, and perform any work necessary, consistent with sound weed prevention and control practices, to control the weeds.

Any expense incurred by the County in effecting the control of said noxious weeds shall be charged to you, and any expenses which remain unpaid 90 days after being assessed shall become a lien on the property and shall be collectable by the County Treasurer at the time of collection of the general taxes.

THE FOLLOWING ARE DECLARED TO BE NOXIOUS WEEDS IN SANPETE COUNTY

How to Tackle Noxious Weeds in Your Community

From the Sanpete County Weed Board

The following weeds are officially designed and published as noxious for the State of Utah, as per the authority vested in the Commissioner of Agriculture under Section 4-17-3, Utah Noxious Weed Act. **Users must read and follow product label instructions carefully.** Suggested products for effective chemical treatment are:

Noxious Weed	Effective Chemical Treatment Trade Name	Effective Chemical Treatment Chemical name	Persistence Half-Life in Days
Black Henbane (A,B) Nightshade Family	Chaparral+NIS Opensight+NIS Milestone+NIS	Aminopyralid+Metsulfuron Aminopyralid	42 Days 42 Days
Buffalobur (A) Nightshade Family	Weedmaster	2,4-D+Dicamba	14 days
Burdock (B) Sunflower Family	Weedmaster Milestone+NIS	2,4-D+Dicamba Aminopyralid	14 Days 35 Days
Canada Thistle (P) Sunflower Family	Milestone+NIS Curtail+NIS	Amniopyralid Clopyalid	35 Days 40 Days
Curly Dock (P) Buckwheat Family	Telar+NIS Milestone+NIS Roundup	Chlorsulfuron Aminopyralid Glyphosate	40 Days 35 Days 47 Days
Dyers Woad (P) Mustard Family	Telar+NIS Escort+NIS	Chlorsulfron Metsulfuron Methyl	40 Days 42 Days
Hoary Cress (P) White Top Mustard Family	Telar+NIS Escort+NIS	Chlorsulfron Metsulfron Methyl	40 Days 42 Days
Hounds Tongue (B) Borage Family	Telar+NIS Escort+NIS Weedmaster	Chlorsulfuron Metsulfuron Methyl 2,4-D+Dicamba	40 Days 42 Days 14 Days
Perennial Pepperweed (P) (Tall White Top) Mustard Family	Escort+NIS Telar+NIS Opensight, Charparral +NIS	Metsulfuron Chlorsulfuron Aminopyralid+Metsulfuron	42 Days 40 Days 42 Days
Russian Knapweed (P) Sunflower Family	Milestone+NIS Telar+NIS Escort+NIS	Aminopyralid Chlorsulfuron Metsulfron Methyl	35 Days 40 Days 42 Days

Noxious Weed		Effective Chemical Treatment	Effective Chemical Treatment Chemical name	Persistence Half-Life in Days
		Trade Name		
Scotch Thistle Sunflower Family	(8)	Milestone+NIS Telar+NIS Escort+NIS	Aminopyralid Chlorsulfuron Metsulfuron Methyl	35 Days 40 Days 42 Days
Yellow Toadflax Figwort Family	(P)	Telar+M.S.O. Tordon**	Chlorsulfuron+M.S.O. Picloram**	40 Days 90 Days
Dalmation Toadflax Figwort Family	(P)	Telar+NIS Escort+NIS	Chlorsulfuron Metsulfuron Methyl	40 Days 42 Days
Field Bindweed Morning Glory	(P)	Escort+NIS Telar+NIS	Metsulfuron Methyl Chlorsulfuron	42 Days 40 Days
Disffuse Knapweed (A, Sunflower Family	SLP)	Milestone+NIS Chaparral, Opensight+NIS	Aminopyralid Aminopyralid Metsulfuron Methyl	35 Days 42 Days
Musk Thistle Sunflower Family	(B)	Milestone+NIS Weedmaster	Aminopyralid 2,4-D+Dicamba	35 Days 14 Days

^{* 2-4}D is most effective when applied when plant first rises or is in the rosette stage.

A = Annual	SLP = Short Lived Perennial
B = Biennial	NIS = Non-ionic Surfactant @ 0.25% v/v
P = Perennial	MSO = Modified Vegetable Oil Surfactant

^{**} USERS MUST READ, FOLLOW AND UNDERSTAND PRODUCT LABEL INSTRUCTIONS CAREFULLY. BE AWARE OF GRAZING RESTRICTIONS AND ALL OTHER WARNINGS ON LABEL.

^{**} Tordon 22K require chemical certification to purchase and use.

^{***} Half-life in days means the average number of days for the residual concentration to decrease by one-half. For example: If the half-life is "30 days" then after 30 days the residual decreases again by half, and is now one quarter of that you applied. The residual continue to drop by additional half each 30 days.
